PAPER

Characterization of the density and mechanical properties of corn husk fiber reinforced polyester composites after exposure to ultraviolet light

Nasmi Herlina Sari^{1,*}, Suteja¹, R A Ilyas^{2,3} , Edi Syafri⁴  and S Indran⁵

¹ Department of Mechanical Engineering, Faculty of Engineering, University of Mataram, Mataram, West Nusa Tenggara, Indonesia

² School of Chemical and Energy Engineering, Faculty of Engineering, Universiti Teknologi Malaysia, 81310 UTM Johor Bahru, Johor, Malaysia

³ Centre for Advanced Composite Materials (CACM), Universiti Teknologi Malaysia (UTM), Johor Bahru 81310 Johor, Malaysia

⁴ Department of Agricultural Technology, Politeknik Pertanian, Payakumbuh, Indonesia

⁵ Department of Mechanical Engineering, Rohini College of Engineering and Technology, Kanyakumari, Tamilnadu, India

* Author to whom any correspondence should be addressed.

E-mail: n.herlinasari@unram.ac.id

Keywords: corn husk fiber composites, polyester, ultraviolet, tensile strength, flexural strength, scanning electron microscopy (SEM)
