JURNAL PENELITIAN LUMBUNG, Vol. 14, No. 1, Januari 2015 1 ANALISA USAHATANI INTEGRASI PADI-SAPI POTONG Mukhlis1), Melinda Noer2), Nofialdi2) dan Mahdi2) ABSTRACTS A demand of meat consumption increases with the increasing in population by years to years in Indonesia. The efforts has be done in livestock farming to meet that demand, which one of them is the application of Integrated farming concepts.

The concepts resolve the common problems in livestock business, those are rice straw that has not been used optimally, expensive and scarce availability of urea fertilizer, livestock waste has not been properly utilized and also untapped cocoa shell waste (in integrated farming with cocoa plantation). The aims of the study are: 1) to knowing increasing profit on implementation of Integrated farming with compared to conventional systems and 2) to analyze the farm feasibility of the application of Integrated farming and conventional systems.

The conclusions of this research are: 1) Revenue and profit of conventional
