209 Pengembangan Wilayah Berbasis Pertanian Terpadu Tanaman Padi dan Ternak Sapi Potong Mukhlis1], Melinda Noer2], Nofialdi2], dan Mahdi2] ABSTRACT This article discusses the concepts and results of research on the development of the region, the concept and the results of **research on integrated farming** systems, the importance of regional development based integrated farming system, and the implementation of an integrated farming system of rice crops and cattle. Regional development is very important to encourage the agriculture development, because regional development aims to improve the lives of people such as increasing revenue, increase value-added of processing industry and create employment opportunities.

Implementation of integrated farming systems in regional development is very important and can be a solution to the various problems that arise in the regional development during this time, because the integrated farming system has many usages and advantages and benefits in line with the objectives of t
